- ✓ Visual + interactive classroom learning
- ✓ Chapter-aligned AI support
- ✓ White-labelled for your school

Classroom
Visual + Interactive

Four reasons that

LearnLi is not positioned as “another AI app.” It gives schools

Teach Better

Use visual and interactive learning on smart boards, TVs and projectors to explain complex concepts step by step.

VISUAL + INTERACTIVE

CLASSROOM LEARNING

Learn Better

Students continue with the same chapter content at home, supported by prerequisites, Ask Li, visuals and guided exercises.

LEARNING

Improve Better

The Scoring Partner shows exactly what was missed, incomplete or incorrect — including step-by-step errors in Mathematics.

IDENTIFICATION

Position Better

Give students and parents a school-branded digital learning experience that strengthens the school's technology leadership.

LEARNING PLATFORM

A COMPLETE LEARNING JOURNEY

Prepare. Engage. Understand. Practise. Improve.

The strongest story is not a list of features. It is a structured learning journey that helps students become ready to learn, understand difficult ideas and know exactly what to improve.

1. Get Ready to Learn

Prerequisite Readiness

If a foundation concept is weak, the student can understand it first instead of struggling through the new chapter.

Hook

Real-life context, visuals and key questions answer "Why am I learning this?" before the lesson begins.

2. Learn Smarter

Learn with Li

Combine text, images, examples and exercises to make learning active rather than just digital reading.

Ask Li

Students can request a simpler explanation, a table, an example, comparison or a step-by-step breakdown without leaving the chapter.

Real-World Knowledge Application

Where this chapter lives outside the exam: labs, clinics, workshops and the work that uses these ideas.

Pronunciation Lab

Hear and practise the keywords, with IPA, until they are speakable.

3. Practise, Test & Improve

Exercises That Teach

Help students understand what the question asks, which concept applies and how a strong answer should be approached.

Quick Look

A short outline so the student knows the shape of the work first.

Take a Quiz

A conceptual mock of the chapter — before the school test, not after.

Create Your Own Test

Subject, chapters, duration, MCQ / blanks / one-word — then schedule it.

Track the Gaps

Keep a history of repeated mistakes and incomplete concepts so improvement can become focused instead of guesswork.

4. Discover Your Future

Career Explorer

See the roles, pathways and next steps this chapter opens — so students connect today's lesson to a future they can aim for.

WHITE-LABEL

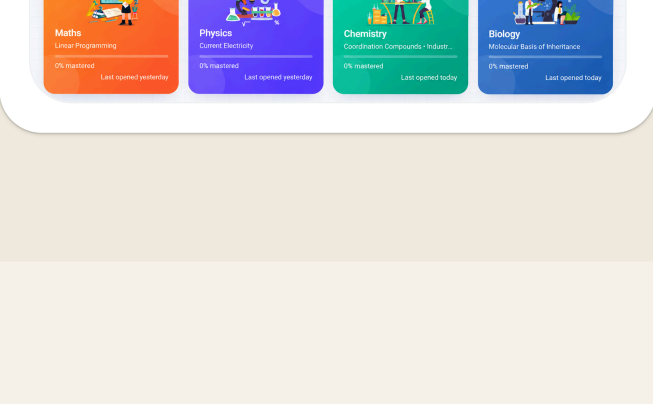

Your school. Your learning platform.

Deliver LearnLi as a white-labelled learning environment with your school's identity. Students and parents experience the technology as part of the school's own learning ecosystem — not just another external app.

Position your institution as a technology-forward school that provides modern learning infrastructure both inside and outside the classroom.

TRUST MATTERS IN SCHOOL AI

Designed for learning — with visibility and safeguards.

A school evaluating AI needs more than feature claims. The website should clearly explain how learning content, student data, AI behaviour and teacher visibility are handled.

Chapter-Bound AI

Keep AI assistance anchored to the curriculum and current learning context rather than becoming an unrestricted answer feed.

Teacher Visibility

Give teachers appropriate visibility into learning activity, progress and recurring gaps.

Student Data Protection

Publish clear privacy, data-use and retention practices for schools, parents and students.

Validated Learning Content

Explain how curriculum content is reviewed, maintained and kept aligned with the intended syllabus.

Sample copy only — publish only safeguards and data practices that LearnLi actually implements.

THE COMPANY BEHIND LEARNLI

Effective & innovative learning tools, built with purpose.

Profluent Labs Pvt. Ltd.

ABOUT US

Profluent Labs is a technology-driven company with over eight years of proven expertise in IT services, proudly serving as a trusted technology partner to global clients, including American Eagle Outfitters (USA), and Freudenberg (Germany). Evolving with purpose, we are now entering the eLearning SaaS space with innovative, tailor-made digital learning tools built for specific niche segments.

Our purpose

To make learning easy, effective, and enjoyable with technology that's accessible and affordable for every educator and learner.

Brand promise

Smart digital tools that empower every educator and learner.

What we believe

Appropriate application of technology can revolutionize the learning experience and deliver excellent results.

OUR STORY

With over two decades of experience designing smart learning solutions for Fortune 100 companies — and international awards along the way — our founder started this eLearning SaaS journey with a simple idea: leveraging technology to empower learning should not require technical expertise, a large budget, or extra infrastructure.

RECOGNITION

Most Promising EdTech Startup of the Year — 5th GCC Leadership Conclave, Leadership Federation, Pune (21-22 January 2026).
