

LEARNLI

# Choose depth over drill.

LearnLi is not just an app you open. It is a setting you study in — a companion for every chapter, every doubt, every test.

# Everything a chapter needs, before the exam asks for it.

## Ask Li

Doubts, in the chapter

## Listen & voice

Hear it. Talk it back.

## Overview first

See the chapter whole

## Pronunciation

Keywords + IPA

## Your own test

Chapters, timer, mix

## Image upload

Photo → practice

## Study plans

Time you can keep

## Levels & points

Streaks and badges

### GUIDED TUTOR

## Learn with Li

A structured walk through the active chapter, in order, without rushing.

### CLEAR DOUBTS

## Ask Li

Type, talk, or upload a page. Li answers inside this chapter — not the whole internet.

### SEE THE IDEA

## Visual learning

Diagrams and interactive views for the chapters that need to be seen, not only read.

# Smart sections

01

## Simple overview

A short outline so the student knows the shape of the work first.

02

## Pre-requisites

The ideas that must already be in place — reviewed before the dive.

03

## Industry insights

Where this chapter lives outside the exam: labs, clinics, workshops, careers.

04

## Pronunciation lab

Hear and practise the keywords, with IPA, until they are speakable.

05

## Take a quiz

A conceptual mock of the chapter — before the school test, not after.

06

## Li scoring partner

Li names the gaps and sends the student back to the exact idea.

---

## Create your own test

Subject, chapters, duration, MCQ / blanks / one-word — then schedule it.

## Study plans

Daily time, duration, morning to night. A plan a student can actually keep.

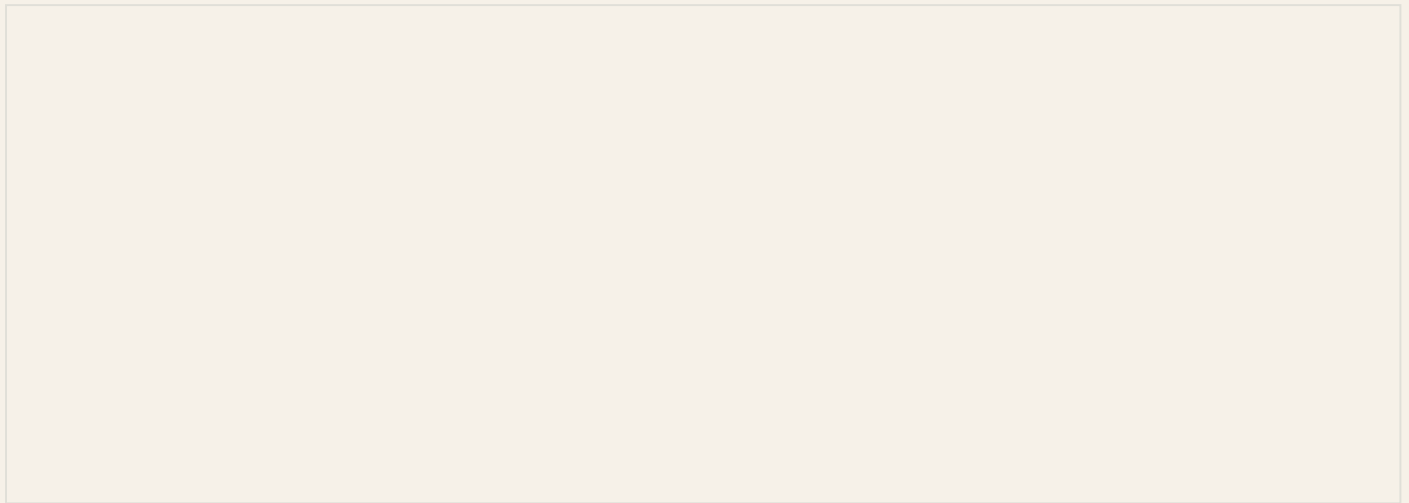

## Image-led questions

Upload a diagram or homework photo. The page in hand becomes practice on screen.

## Levels and points

Streaks, badges, a level path. Progress counted in work done.

# Three dashboards. One story of progress.

## Student dashboard

Active chapter, modes, quizzes, goals, careers — the next honest step.

## Parent dashboard

Time, scores, streaks, upcoming tests. Close, without hovering.

## Teacher dashboard

Who is moving, who is stuck, which chapters need another pass.

---

## THE COMPANY

Help every student in Grades 6–12 understand the chapter in front of them, practise it properly, and show that progress to the people who care.

## THE PRODUCT

An AI-assisted CBSE platform. Li teaches, answers, listens, speaks, quizzes, and plans. Students work chapter by chapter. Parents and teachers see the same story.
