C
Formula: C₁₀H₁₆N₅O₇P

Stores Genetic Information

Molar Mass:
111.10 g/mol

Molecular Formula:
G (3 H-Bonds)

Cytosine is a pyrimidine nucleobase. It acts as the structural counterpart to Guanine. Cytosine methylation is a critical process in epigenetics, serving as an epigenetic switch for gene transcription.

KEY DIFFERENTIATOR

Your personal Scoring Partner — whenever you study.

Students may study early in the morning or late at night when a teacher or parent is not available. LearnLi evaluates their work and tells them exactly where improvement is needed.

Science

Tamil scoring partner — Mendel's laws, Grade 12 Biology.

Mathematics

Tamil step-by-step evaluation — Integrals, with formula, arithmetic and follow-on errors named.

Students can track recurring gaps over time — helping an average performer strengthen foundations and a high performer identify the small gaps between 90 and 100.

ASK LI

Ask anything in the chapter. LI - Learning Intelligence answers like a tutor, not a search box.

A teal companion window: type a doubt, get a definition, an equation, and the school example. The same Ask Li thread in English and Tamil.

Ask me anything about your studies.

what is photosynthesis ?

Photosynthesis. The process by which green plants make food using sunlight.

Definition. Carbon dioxide and water become glucose and oxygen, with chlorophyll and light.

Chemical equation. $6\text{CO}_2 + 6\text{H}_2\text{O} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$

English is live — top Photosynthesis, Heat, or Integers. Tamil shows the same photosynthesis thread.

A COMPLETE LEARNING JOURNEY

Prepare. Engage. Understand. Practise. Improve.

The strongest story is not a list of features. It is a structured learning journey that helps students become ready to learn, understand difficult ideas and know exactly what to improve.

1. Get Ready to Learn

Prerequisite Readiness

If a foundation concept is weak, the student can understand it first instead of struggling through the new chapter.

Hook

Real-life context, visuals and key questions answer "Why am I learning this?" before the lesson begins.

Learn Smarter

Learn with Li

Combine text, images, examples and exercises to make learning active rather than just digital reading.

Ask Li

Students can request a simpler explanation, a table, an example, comparison or a step-by-step breakdown without leaving the chapter.

Real-World Knowledge Application

Where this chapter lives outside the exam: labs, clinics, workshops and the work that uses these ideas.

Pronunciation Lab

Hear and practise the keywords, with IPA, until they are speakable.

3. Practise, Test & Improve

Exercises That Teach

Help students understand what the question asks, which concept applies and how a strong answer should be approached.

Quick Look

A short outline so the student knows the shape of the work first.

Take a Quiz

A conceptual mock of the chapter — before the school test, not after.

Create Your Own Test

Subject, chapters, duration, MCQ / blanks / one-word — then schedule it.

Track the Gaps

Keep a history of repeated mistakes and incomplete concepts so improvement can become focused instead of guesswork.

4. Discover Your Future

Career Explorer

See the roles, pathways and next steps this chapter opens — so students connect today's lesson to a future they can aim for.

WHITE-LABEL

Your school. Your learning platform.

Deliver LearnLi as a white-labelled learning environment with your school's identity. Students and parents experience the technology as part of the school's own learning ecosystem — not just another external app.

Position your institution as a technology-forward school that provides modern learning infrastructure both inside and outside the classroom.

TRUST MATTERS IN SCHOOL AI

Designed for learning — with visibility and safeguards.

A school evaluating AI needs more than feature claims. The website should clearly explain how learning content, student data, AI behaviour and teacher visibility are handled.

Chapter-Bound AI

Keep AI assistance anchored to the

Teacher Visibility

Give teachers appropriate visibility

Student Data Protection

Publish clear privacy, data-use and retention

Validated Learning Content

curriculum and current learning context rather than becoming an unrestricted answer feed.

into learning activity, progress and recurring gaps.

practices for schools, parents and students.

Explain how curriculum content is reviewed, maintained and kept aligned with the intended syllabus.

Sample copy only — publish only safeguards and data practices that LearnLi actually implements.

BRING LEARNLI TO YOUR SCHOOL

Make teaching more visual. Learning more personal. Improvement more measurable.

See how LearnLi can support your teachers in the classroom and continue helping every student after school — through your school's own digital learning platform.
