Sexual Reproduction in Flowering Plants

Grade 12 Biology • Chapter 6

- 1 The Flower Mystery
- 2 Pollen Pollination
- 3 Grow With Pollen Tube
- 4 Inside the Ovule
- 5 Flower → Fruit

STEP 3 • POLLINATION AND FERTILISATION
What Happens After Pollen Lands?
A pollen tube grows through the style towards an ovule inside the ovary.

Follow the Pollen Tube

Landing on the stigma is only the beginning. The pollen grain germinates and a pollen tube grows down through the style towards an ovule inside the ovary.

Concentration Changes Cell Voltage

Zn²⁺ concentration: 2.00 M
Cu²⁺ concentration: 0.94 M
 $E = E^\circ - (0.0592 / n) \log Q$
 $n = 2, 25^\circ \text{C}$

Zn²⁺ concentration is higher
The cell potential decreases
to approximately 1.09 V.

LINEAR PROGRAMMING

Use limited money and space to find the best possible plan.

Write the Constraints

The money limit, storage limit and non-negative conditions decide which plans are allowed.

Move the number of tables

Use the slider. The lesson calculates the greatest number of chairs that can be paired with that many tables without breaking either limit.

5x + y ≤ 100

x + y ≤ 60

x ≥ 0, y ≥ 0

For x = 11 tables:
Investment allows y ≤ 45; storage allows y ≤ 49.
So the greatest valid chair value is y = 45.
The boundary point is (11, 45).

WHY SCHOOLS CHOOSE LEARNLI

Four reasons that matter to a school.

LearnLi is not positioned as “another AI app.” It gives schools better classroom tools, stronger at-home learning support, measurable improvement and a modern digital identity.

01

Teach Better

Use visual and interactive learning on smart boards, TVs and projectors to explain complex concepts step by step.

VISUAL + INTERACTIVE CLASSROOM LEARNING

02

Learn Better

Students continue with the same chapter content at home, supported by prerequisites, Ask Li, visuals and guided exercises.

AI-POWERED PERSONAL LEARNING

03

Improve Better

The Scoring Partner shows exactly what was missed, incomplete or incorrect — including step-by-step errors in Mathematics.

PRECISE LEARNING-GAP IDENTIFICATION

04

Position Better

Give students and parents a school-branded digital learning experience that strengthens the school's technology leadership.

YOUR SCHOOL'S OWN LEARNING PLATFORM

INTERACTIVE LEARNING

When the idea has to be seen — a model you can inspect, not a static figure.

Students select a part, turn the model, and read what it does — on a classroom screen or at home. This is how LearnLi complements a board-and-chalk session.

Click on a base pair to mutate it or inspect it.

Prepare. Engage. Understand. Practise. Improve.

The strongest story is not a list of features. It is a structured learning journey that helps students become ready to learn, understand difficult ideas and know exactly what to improve.

1. Get Ready to Learn

Prerequisite Readiness

If a foundation concept is weak, the student can understand it first instead of struggling through the new chapter.

Hook

Real-life context, visuals and key questions answer “Why am I learning this?” before the lesson begins.

2. Learn Smarter

Learn with Li

Combine text, images, examples and exercises to make learning active rather than just digital reading.

Ask Li

Students can request a simpler explanation, a table, an example, comparison or a step-by-step breakdown without leaving the chapter.

Real-World Knowledge Application

Where this chapter lives outside the exam: labs, clinics, workshops and the work that uses these ideas.

Pronunciation Lab

Hear and practise the keywords, with IPA, until they are speakable.

3. Practise, Test & Improve

Exercises That Teach

Help students understand what the question asks, which concept applies and how a strong answer should be approached.

Quick Look

A short outline so the student knows the shape of the work first.

Take a Quiz

A conceptual mock of the chapter — before the school test, not after.

Create Your Own Test

Subject, chapters, duration, MCQ / blanks / one-word — then schedule it.

Track the Gaps

Keep a history of repeated mistakes and incomplete concepts so improvement can become focused instead of guesswork.

4. Discover Your Future

Career Explorer

See the roles, pathways and next steps this chapter opens — so students connect today's lesson to a future they can aim for.

WHITE-LABEL

Your school. Your learning platform.

Deliver LearnLi as a white-labelled learning environment with your school's identity. Students and parents experience the technology as part of the school's own learning ecosystem — not just another external app.

Position your institution as a technology-forward school that provides modern learning infrastructure both inside and outside the classroom.

TRUST MATTERS IN SCHOOL AI

Designed for learning — with visibility and safeguards.

A school evaluating AI needs more than feature claims. The website should clearly explain how learning content, student data, AI behaviour and teacher visibility are handled.

Chapter-Bound AI

Keep AI assistance anchored to the curriculum and current learning context rather than becoming an unrestricted answer feed.

Teacher Visibility

Give teachers appropriate visibility into learning activity, progress and recurring gaps.

Student Data Protection

Publish clear privacy, data-use and retention practices for schools, parents and students.

Validated Learning Content

Explain how curriculum content is reviewed, maintained and kept aligned with the intended syllabus.

Sample copy only — publish only safeguards and data practices that LearnLi actually implements.

THE COMPANY BEHIND LEARNLI

Effective & innovative learning tools, built with purpose.

Profluent Labs Pvt. Ltd.

PROFLUENT LABS
Effective & Innovative

ABOUT US

Profluent Labs is a technology-driven company with over eight years of proven expertise in IT services, proudly serving as a trusted technology partner to global clients, including American Eagle Outfitters (USA), and Freudenberg (Germany). Evolving with purpose, we are now entering the eLearning SaaS space with innovative, tailor-made digital learning tools built for specific niche segments.

Our purpose

To make learning easy, effective, and enjoyable with technology that's accessible and affordable for every educator and learner.

Brand promise

Smart digital tools that empower every educator and learner.

What we believe

Appropriate application of technology can revolutionize the learning experience and deliver excellent results.

OUR STORY

With over two decades of experience designing smart learning solutions for Fortune 100 companies — and international awards along the way — our founder started this eLearning SaaS journey with a simple idea: leveraging technology to empower learning should not require technical expertise, a large budget, or extra infrastructure.

RECOGNITION
